**(MESSAGES/REMARKS)**

Mr. Kevin Mixon returned my call from Friday March 28<sup>th</sup> 2008 in regard to the PNDI search and subsequent correspondence from the Game Commission for the Potential Impact that was discovered during the PNDI investigation that was conducted. Mr. Mixon is acting as the Wildlife Impact Review Coordinator in the absence of Mr. James Leigey, the gentleman who wrote the original correspondence about the PNDI potential impact.

The project team was concerned about the possibility of clearing and grubbing during the time that the PGC recommends that tree cutting not occur. Mr. Mixon relayed that the cutting would not be a problem in the area of the proposed high school and that if there were potential impacts to bats hibernating in the area, specific special restrictions would have been forwarded from the PGC.

Mr. Mixon also noted that he would put a phone log description into the records for the project that we have spoken with him in regard to the cutting and that the activities were cleared with him.

If anyone has any questions about the tree cutting activities that are to occur on the site, please contact Mr. Mixon at the number listed above.
